

Quarterly Report

Planning for Healthy Babies Program (P4HB) 1115 Demonstration in Georgia

Quarter 2

April 1, 2011 – June 30, 2011

Submitted to Centers for Medicare and Medicaid Services (CMS) by:

Georgia Department of Community Health (DCH)

September 30, 2011

OVERVIEW

The Georgia Department of Community Health (DCH) was granted authority by CMS to expand access to family planning services under the Planning for Healthy Babies (P4HB) program to newly qualified women ages 18 through 44 years if they meet income and other eligibility requirements. This demonstration began January 1, 2011 and is scheduled to end December 31, 2013. This report provides information on several operational aspects of P4HB through the second quarter of the waiver's operation.

Pursuant to the requirements of this Section 1115 Demonstration, the data and analysis contained herein include the following elements:

- Total number of enrollees;
- Total number of participants;
- Total expenditures (including administrative costs);
- Updated budget neutrality worksheet;
- Events occurring during the quarter, or anticipated to occur in the near future that affect health care delivery, benefits, enrollment, grievances, quality of care, access, pertinent legislative activity, eligibility, verification activities and other operational issues;
- Action plans for addressing any policy and administrative issues identified;
- Evaluation activities and interim findings.

The quarterly report presents Georgia data on several measures of progress for the waiver along with an analysis of the status of the various operational aspects of the Demonstration.

ELIGIBILITY, ENROLLMENT AND PARTICIPATION

We report on enrollee counts from two sources of data. The first reports on all applications, denials and eligibility counts, through the end of the second Quarter (June 2011). We also provide a summary of the CMO counts of family planning (FP) and Interpregnancy Care (IPC) enrollees and participants through

the end of June.

At the state level, there were 2,962 women deemed eligible for Planning for Healthy Babies (2,957 for FP only Benefits and 5 for IPC Benefits) following review of their applications and supporting materials as of June 2011. This indicates a marked increase (over 1000%) from the 260 deemed eligible by the end of the first quarter of P4HB. As in the first quarter of P4HB, the majority (91%) of these women are under age 36 with over one-third (38%) in the 18-22 age group and another thirty six percent, ages 23-29. The remaining 26% are 30 years of age or older but only 3% are over age 40.

Table 1: Eligibility, by age and county: January-June 2011

Deemed Eligible	Family Planning	IPC
By Age		
18-22	1136	1
23-29	1075	3
30-35	475	1
36-40	197	0
41-44	79	0
Total	2957	5
By County: Top 5 Counties, Program to Date with individuals Deemed Eligible		
Fulton	314	0
DeKalb	194	0
Gwinnett	156	0
Cobb	116	0
Clayton	116	0
Total	896	0

(Table 1 Source – P4HB – Report 11 for June 2011)

While there were no women deemed eligible for the IPC component in the first quarter, as of the end of June, there were 5 women deemed eligible for IPC benefits. The data in Table 1 again indicates there is a concentration of the 2,962 eligible women within metro-Atlanta counties (Fulton, DeKalb, Gwinnett and Cobb) and the nearby county of Clayton. The percentage of eligible women in these five counties was 30% (896/2,962) in the second quarter. This percentage is much lower than it was in the first quarter (86%), indicating that women in other metro and rural counties of Georgia are increasingly learning about P4HB and making application to the program.

The total number of enrollees reported as being enrolled in a CMO for FP or IPC benefits as of the end of June was far below the nearly 3,000 reported as eligible at the state level. Across all three CMOs, 1,249 women were enrolled, or 42% of those deemed eligible. This indicates a marked increase from the first quarter for each CMO. The CMOs reported a little over 50% of the enrolled women as active participants (received services) in the program. One CMO reported all enrollees as participating. (Source – P4HB Quarterly CMO Reports)

The CMOs provided data on IPC enrollment separate from FP only enrollees. As of June 2011, two CMOs reported having one IPC enrollee. One enrollee was in the 18-22 year old range while the other was over age 30. One CMO reported a care plan was in place for their IPC enrollee.

The CMOs also reported on the number of employees they have hired to serve those eligible for the Resource Mother/Case Management benefit component of the waiver. In the table below we show these numbers along with the number of participants the CMOs reported as being served by the resource mothers.

Resource Mother

	CMO1	CMO2	CMO3
Total # RM employed	0	6	1
Total # of participants served by RM	0	0	1
Total face to face visits	N/A	N/A	1
Total phone calls	N/A	N/A	4

We have noted a delay between program eligibility and CMO enrollment due to the time needed for the woman to choose her CMO from among the CMOs participating in her area. If she fails to choose, she is auto-assigned to a CMO. There have also been delays between the initial application and receipt of the finished application by the Right From the Start Medicaid (RSM) workers.

EXPENDITURES

Administrative Expenditures

Administrative expenditures under the Demonstration were incurred largely for the RSM case-workers, Policy Studies Incorporated (PSI) enrollment services and DCH program staff. Because a separate administrative budget was not established by DCH for the Planning for Healthy Babies program, the program's administrative expenses are not included in this report. The administrative expenditures for the P4HB program documented in the Quarter 1 report were included in error.

Benefit Expenditures

Per the DCH financial system, the total amount spent on FP Benefits through the end of June totaled \$72,157, all of which was paid through the CMO capitated PMPM arrangement.

UPDATED BUDGET NEUTRALITY

CMS shared a revised budget neutrality worksheet for the P4HB Demonstration in early September 2011. This worksheet was completed for quarters 1 and 2 of this Demonstration and is attached to this report. As noted above, there were no IPC Demonstration enrollees by the end of the first quarter and hence, there were no expenditures nor cost savings for this component of the Demonstration. There were 3 IPC enrollees reported for the second quarter.

P4HB COMMUNICATION PLAN and OUTREACH ACTIVITIES

In preparation for the launch of the Planning for Healthy Babies (P4HB) program, the Department of Community Health (DCH) developed a multi-pronged communications plan. This plan incorporates five (5) specific phases for the marketing of P4HB throughout the state. Each of these phases is described in Table 2 below.

Table 2: P4HB Communication Plan

Phase	Activities	Status
<p>Phase 1: Educate Providers and CMOs Focuses on educating health care providers and CMOs about P4HB. These are the major stakeholders identified through the Communication Plan as having “the most potential to positively influence and impact the behaviors of patients through preventative care measures.”</p>	<ol style="list-style-type: none"> 1) Introducing a revised P4HB Communication Plan to the Work Group and the CMOs; 2) Develop a page on the DCH website for the P4HB program that provides specific information about the program, benefits, provider network, client eligibility and enrollment and program application; and 3) Introduce the P4HB program and program-related materials to the CMOs (including program logo, poster and postcards). 	<ol style="list-style-type: none"> 1) Ongoing. The communications plan is a living document and Draft plan updates are made periodically by the DCH Communications Team led by Joyce Burton. 2) Completed 3) Completed
<p>Phase 2: Leverage the Strengths & Assets of Partners Purpose is to use local experts to champion LBW prevention by encouraging eligible women in their respective communities to enroll in the P4HB program</p>	<p>The Improving Birth Outcomes Work Group will identify local experts at the district level. Additional organizations and providers also identified as potential collaborators, including MCH staff, WIC staff, family practice providers, pediatricians, faith community leaders, nursing and medical schools, nurse midwives, health care professionals, OBGYNs, policymakers, media representatives, civic and cultural leaders, and tobacco program coordinators.</p>	<p>All activities are still ongoing and being led by Kaprice Welsh and the RLBW group. Please see attached list of stakeholders, community leaders, health care professionals, etc. The RLBW initiative started in July of 2009 and there were a total of 22 monthly meetings since then. A strategic work plan was developed by the group to address the surrounding LBW/VLBW issue in Ga.</p>
<p>Phase 3: Implement Consumer-Based Outreach (Statewide and Locally) Purpose is to inform consumers and providers about P4HB using media, messaging, and an organized set of communication activities</p>	<ol style="list-style-type: none"> 1) Introduce campaign to 18 public health districts 2) Outline marketing proposal and estimated costs 3) Determine overall budget and process in which marketing materials will be purchased 4) Buy billboards, radio and print ads Advertisement will occur in 2 phases over course of program, and counties with highest 	<ol style="list-style-type: none"> 1) Ongoing. The RSM staff from the Department of Family and Children’s Services has been instrumental in our “grassroots” outreach efforts within the 18 public Health districts. Outreach activities include, training PH staff on P4HB, providing

Phase	Activities	Status
	<p>LBW rates will be targeted first for billboard ads.</p> <p>5) Finalize copy for poster/postcard design</p> <p>6) Obtain approval of printing cost for posters/postcards; obtain shipping addresses</p> <p>7) Provide RSM, PH department, and DFCS officials with notice that postcards/posters will be distributed and guidance about how to use them.</p> <p>8) Draft/distribute press release announcing launch of P4HB program.</p> <p>9) Pitch background sessions to identified reporters from the Atlanta Journal & Constitution.</p> <p>10) Begin brainstorming a newsworthy event for Summer 2011</p> <p>11) Other activities: theater ads, health fairs, participating in cause-related charitable events, articles in provider organization newsletters; news releases, media advisories, op-eds, podcast messages placed on PH4B website, FaceBook and Twitter pages. In addition, the Plan calls for media advisories, op-eds and conducting "background sessions" with area reporters to discuss the state's efforts to reduce its LBW rate.</p>	<p>education and training to local providers, disseminating P4HB posters, postcards, and applications to community groups and offices serving women and children.</p> <p>2) Completed</p> <p>3) Completed</p> <p>4) Completed</p> <p>5) Completed</p> <p>6) Completed</p> <p>7) Completed</p> <p>8) Completed</p> <p>9) Completed</p> <p>10) Ongoing</p> <p>11) Completed activities include: provider newsletters included in following organizations: The Georgia OBGYN Society, American Academy of Pediatrics (AAP), and Georgia Association of Family Physicians ; news release; news articles about P4HB and interviews with Dr. Carson regarding P4HB</p>

Phase	Activities	Status
<p>Phase 4: Use Existing Resources for Support and Coaching Goal is to use current available resources in Georgia to promote prenatal care, healthy lifestyles before and during pregnancy, and smoking cessation.</p>	<p>Reach out to WIC staff and Georgia Quit Line team and inform them of P4HB and that P4HB will reference them on the P4HB website and possible future marketing materials.</p>	<p>Contacted POWERLINE, a telephone resource sponsored by Georgia's Healthy Mothers, Healthy Babies (HMHB) program. Training planned with HMHB for summer 2011.</p>
<p>Phase 5: Annual Campaign Evaluation To analyze on an annual basis the strengths and weakness of the P4HB program. Four types of evaluation are suggested: 1) formative; 2) process; 3) outcome: and 4) Impact</p>	<ol style="list-style-type: none"> 1) Assess the strengths and weaknesses of campaign materials and strategies 2) Measure effort and the direct outputs of campaign 3) Examine the campaign's implementation and how the activities involved are working 4) Measure effect and changes that result from the campaign. (Assess outcomes in the target populations or communities that come about as a result of the campaign's strategies and activities; measure policy changes.) 5) Measure community-level changes that are achieved as a result of the campaign's aggregate effects on individuals' behavior and the behavior's sustainability. Attempts to determine whether the campaign caused the effects. 6) Make recommendations for Year 2 of the campaign based on data gained from the annual evaluation; implement necessary changes in Year 2 	<p>Activities to be led by the Communications team as well as Kaprice Welsh. Emory University assisting with evaluation.</p>

Provider Outreach

DCH developed a Provider Outreach Information brochure and Provider Manual addendum for P4HB. The Provider Outreach Information brochure and Provider Manual addendum are concise with clearly written descriptions of the P4HB program in terms of the benefits and scope of services, reimbursement, eligibility requirements, and enrollment procedures. The brochure informs providers

they will receive training about P4HB through the CMOs, specifically that the CMOs will provide “ongoing training to all providers of family planning and family planning related services. The CMOs independently developed their Provider Education Action Plans detailing the educational activities related to P4HB.

DCH provided additional training and educational materials (blast fax, P4HB materials) to the following provider organizations: Georgia Primary Care Association; Georgia Association of Family Physicians; American Academy of Pediatrics; and the Georgia OB/GYN Society. In addition, DCH hosted a webinar for the Georgia Hospital Association on April 5, 2011. DCH has maintained regular communication about P4HB with Georgia’s Title X program. DCH provided video information conferencing system (VICS) training to all public health district Title X sites as well as provided them with all of the P4HB outreach materials that have been developed (i.e. postcards, applications, provider FAQ’s. etc)

DCH has directly distributed P4HB materials to various independent provider associations for use during face-to-face visits and has completed plans for hosting 8 webinars for all 18 health districts. Information was distributed to the six Regional Tertiary Centers and to their discharge planners. If they request materials, DCH will contact the RSM staff to provide the materials on an as needed basis (i.e., posters and post cards).

In addition, professional champions have notified their respective professional societies (Georgia Obstetric and Gynecologic Society, Georgia Academy of Family Physicians) about the P4HB program and have disseminated information about the P4HB program in their professional society newsletters. The Georgia Academy of Family Physicians hosted an information session about the P4HB program during its summer membership meeting in June 2011. The Georgia OB/Gyn society presented information on

P4HB at their annual Provider Golf Tournament and plans on offering information at their annual meeting in August.

Additional Outreach Activities

- Provided on site Face –to-Face assistance with completion of P4HB application and educational information targeting IPC members in three regions
- Provided case management (CM) education to High risk OB (HROB) members to include P4HB education and instructions on how to apply for the program
- Conducted telephonic outreach on the following: to alert providers of their newly assigned members; to post partum members to provide education on the P4HB program and how to apply; to newly enrolled P4HBmembers to educate them on benefits and services ; to members with VLBW NICU deliveries to provide education on the P4HB program and how to apply
- Mass mailed applications to post partum members who have recently delivered to educate them on the program
- Distribution of Provider Toolkit to new physicians during their CMO orientation
- Trained DFCS supervisors and administrators on the P4HB program- - provided one P4HB poster in each DFCS office lobby and an ample supply of P4HB applications and postcards.
- Trained Public Health District 7 (16 counties) staff on P4HB program
- Outreach activities performed by the Right from the Start Medicaid (RSM) workers are included beginning on page 17 of this report.

P4HB Marketing

DCH partnered with the Title V program to implement its marketing campaign for the P4HB program. The P4HB Marketing Plan budget is divided into 2 phases. In Phase 1 (January-June 2011), DCH spent \$20,169.09. Of this amount, \$13,190 was spent on producing applications (204,500 English; 142,000 Spanish applications), \$2992 for 32,500 postcards, \$1635 for 1,000 posters, and \$2242 for freight costs.

An additional \$70.08 was spent during this first phase to translate postcards and posters from English to Spanish, and \$50 was spent proofing/editing translated Spanish documents.

For Phase 2 (July and December 2011), marketing costs are projected in the total amount of \$61,019 for contracts with “resident” marketing companies to produce advertisements about P4HB. Also in this phase, there is a total marketing cost of \$68,811.92 projected for pending contracts for additional advertising purchases. The total Phase 2 marketing costs are \$129,830.92. Of this amount, \$31,375 is estimated for PSA billboards in 10 counties which represent the highest LBW rates (*Benn Hill, Crisp, Spalding, Dougherty, Bibb, Lowndes, Walker, Muscogee, Richard, and Tift*). Approximately 55 billboards will be rented for a period of 6 months. Blue Line Media has been hired to provide bus ads for 3 months in the Savannah and Columbus markets with a minimum of 100 buses per city. Total costs for this item are \$7,744. CBS Outdoor/Marta will be paid \$21,900 to produce 275 interior bus cards, advertising on 15 bus shelters in the greater Atlanta area. In addition, \$690 is estimated for printing costs of Spanish posters, and \$3,369 for printing Spanish postcards. Furthermore, \$1,690 has been set aside during Phase 2 for the shipping of Spanish postcards and posters. Radio One advertisements will be paid \$31,500 in a new contract to run radio ads about P4HB for a 6-week time period. Finally \$1,400 will be spent advertising the P4HB in the Expectant Mother’s Guide, which will run the advertisement from August 2011 through January 2012. This Guide is available in Fulton, Dekalb, Gwinnett and Cobb Counties.

BARRIERS TO ENROLLMENT

DCH identified the application approval process as a barrier to enrollment in P4HB. Data obtained from DCH’s tracking reports indicate no significant change in average time from application to referral to RSM from January to June of 2011. This average time did decrease from 12.5 days on average in January 2011 to 10.0 days in March 2011. However the average time went up 150% in April 2011 to 25.0 days, but was

back down to 12.3 days on average in June 2011. We have identified that potential enrollees fail to submit the required documentation in order that a timely approval process can take place. (Source – P4HB – Report 15 , April-June 2011)

A second barrier relates to the document verification process. Federal Medicaid regulations require that original documents be used for verification of citizenship. In light of this, DCH has educated local public health offices that as a qualified Medicaid provider they can view original identity verification documents, copy and indicate by signing the copy that the originals have been viewed. This signed copy can then be sent to PSI with the application. The criteria and process to become a “qualified provider” is provided to any entity desiring to provide this service to potential P4HB members.

ACTION PLANS

- 1) **Maintain ongoing communication with family planning and OBGYN providers:** While DCH has worked with family planning and OBGYN providers to inform them about P4HB, this communication will continue throughout the life of the waiver program.
- 2) **Engage Providers Involved in High Risk Pregnancies:** Well over 400 very low birth weight babies had been delivered by the end of the second quarter, 2011. Provider feedback indicates that women are so preoccupied with the health of their sick babies that they are not focused on their own health. Providers are being encouraged to increase their outreach to these women. Upcoming CMO surveys of providers (and clients) should provide more insight into barriers to enrollment of these women. We anticipate further increases in the IPC enrollment in future Demonstration quarters.
- 3) **Engage Georgia’s Title X Family Planning Program:** DCH continues to actively and regularly engage Georgia’s Title X Family Planning Program. This program is a natural connection to family planning providers and current, low-income clients who are likely eligible for P4HB. This communication informs the Georgia Title X Family Planning Program of the need to include P4HB information in its current family planning campaign, “Ask Us About Safe Family Planning.” Current materials about this Title X campaign indicate that Medicaid is accepted, but no

indication is given about P4HB specifically nor how enrollees may utilize these sites for P4HB-paid services.

- 4) **Market P4HB in Areas/Programs where Low-Income Women Receive Services:** Teens or other young women who are uninsured and either paying out of pocket for family planning services/supplies or going without needed services are at high risk of an unintended pregnancy. DCH hopes to increase their marketing efforts to reach these women in sites such as WIC or food stamp offices, farmer's markets or other sites where women gather and are able to receive brochures.

EVALUATION ACTIVITIES

The activities during this second quarter have included: 1) submission of the revised Draft Evaluation Design to CMS—awaiting another round of comments; 2) revising the Data Sharing Agreement between DCH, Thomson Reuters, Inc, Emory University and Division of Public Health—awaiting its final approval; 3) developing a detailed request for data from Title X; 4) using available PRAMS data to examine patterns of low birth weight among Medicaid and other insurance groups for 2008; 4) estimating the total targeted population in the state (uninsured between 51% and 200% FPL; 5) requesting access to 2009 linked birth/death records for piloting file construction; 6) developing draft survey instruments for the CMO's to use; and 7) seeking funding for a fuller process evaluation.
